

# MAVRO Token ('MVR') Sale Token Sale Agreement

---

Last Update: 19.12.2017

This **Token Sale Agreement** (the "TSA") shall be entered into by and between **MAVRO**, which expression shall, unless it be repugnant to the context or meaning thereof, be deemed to mean and include its successors and permitted assigns (*hereinafter* referred to as "the Company" or "We"), and the purchaser having signed up for the purchase of MAVRO Tokens ("MVR") during the Token Pre-Sale or the Token Main Sale on the companies' website <https://www.mavro.org> which expression shall, unless it be repugnant to the context or meaning thereof, be deemed to mean and include its successors and permitted assigns (*hereinafter* referred to as "the Purchaser" or "You") on the date of its electronic acceptance by Purchaser.

Whereas, Company and Purchaser (hereinafter referred together referred to as "the Parties") desire to enter into a relationship in which the Company will provide Tokens to be used on the websites and other ventures of the MAVRO ecosystem, as explained in Agreements defined in Terms and Conditions and explained below, in exchange for consideration which has been fixed as published by the Company on its Website and/or any of the documents which make up the Agreements.

Now, therefore, in consideration of the premises, and of the mutual promises and undertakings herein contained, the Parties, intending to be legally bound, do hereby agree as follows:

1. a. This TSA sets forth general rules and procedure of the MVR ('Token') Sale by the Company and their purchase by the purchasers. The definitions and terms used in the Agreement will have the meaning assigned to them in the Terms and Conditions ('T&C') document.
2. b. The parties will agree with all the terms specified in all the Accompanying Documents in addition to the terms specified in this TSA.
3. c. Subject to the terms of this TSA and all Accompanying Documents, Company sells and transfers to Purchaser the amount of MVR Tokens subscribed by Purchaser and Purchaser buys the MVR Tokens from Company and accepts their transfer to the ERC 20 compatible wallet specified by Purchaser in the subscription process.

## **GENERAL TERMS**

1. Please read all the documents which form the Accompanying Documents as specified in the T&C carefully before participation in this Token Sale. Note that the T&C contains a binding arbitration clause and class action waiver, which, if applicable to you, affect your legal rights. If you do not agree to these terms of sale, do not visit the Website and Use the Tokens in any manner and also do not participate in the Sale of the Tokens.
2. The Token is not a financial or securities instrument. It is proprietary software made for mere participatory access to the websites and other platforms within the MAVRO ecosystem and certain other limited rights as specified in this document or Accompanying Documents.
3. The purchase of Tokens is not in any way a purchase of equity in/ or debt from the Company or its associated entities.
4. The Tokens are issued at the sole discretion of the Company on submission of the requisite payment, completion of identification procedure, submission of necessary documents and fulfillment of all terms specified in all documents included in 'Agreements' as specified in the T&C. The Company may refuse to allocate or sell any Tokens even on fulfillment of all conditions without assigning any reason thereof.

## **DISCLAIMER**

1. We have consulted with our legal counsel, and have been advised that our token or its related sale is not considered a security. We are operating as a company selling Tokens that will be used within MAVRO ecosystem of financial trading platforms and other ventures. If we determine that any service offering does fall within the scope of a regulation we will be applying to have it regulated in our respective jurisdiction once the token sale has closed. Our Token is not a security since it is simply a form of payment we will be accepted on the MAVRO ecosystem relative to the crowdsale - users have no rights attached to the Token, outside of the participation access provided by ownership of the token and limited rights provided under this TSA or Accompanying Documents. The platforms of the MAVRO are separate from the Token. MAVRO offers services through the MAVRO ecosystem, and will be accepting the usage Tokens on its platforms. However the Token sale and the platforms in the MAVRO ecosystem are separate for all sakes and purposes.
2. This is not an investment product. This document does not constitute investment advice or counsel or solicitation for investment in any security and shall not be construed in that way.

3. This document does not constitute or form part of, and should not be construed as, any offer for sale or subscription of, or any invitation to offer to buy or subscribe for, any securities, nor for the Tokens.

4. This is not a company share stock/derivative. It is a sale of a digital asset.

5. The purchase price of the Tokens are quoted for the token sale and sale only and may change or vary in the future or maybe be changed by the Company without any prior intimation.

6. The payment for the Tokens may be made by Users only in the cryptocurrencies or specified fiat currency in the manner specified in the Website and/or any of the Agreements.

7. The Tokens offer no rights to profits of the Company.

8. The Tokens are not designed or disingenuously devised to acquire stock or money, or any expectation of profits.

9. The Tokens may or may not be listed on various secondary markets for trading, however such trading is incidental and non-consequential to the primary purpose and the actual utility of the Token as specified in the Website and Accompanying Documents.

10. The Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (a) reliance on any information contained in this document, the MAVRO whitepaper; the Website; the Agreements; and (b) any error, omission or inaccuracy in any such information or (c) any action resulting therefrom.

11. Any usage of term "currency" is a general term associated with internal ledger and reward system, built into the MVR software protocol; as it relates to the internal market value within the MAVRO ecosystem. MAVRO expressly disclaim any representation that MVR seeks to operate as an instrument of interstate commerce, "money", or monetary instrument regulated by relevant governmental authorities inside or outside of the United States.

12. By purchasing tokens from any country during the sale period and/or using them in connection with the platforms (as defined below), you will be bound by this TSA and all terms incorporated by reference.

13. The TSA or any of the Agreements will not be interpreted against one party merely as it was drafted by the party.

14. Declaration by Purchaser: I agree to the above terms and disclaimers required to receive MVR Tokens during this Token Sale. I also declare that I am at least 18 (Eighteen) years old, not from a Restricted Country or state and am competent to

provide valid consent to the same as per the laws applicable to me. I understand that investing carries a certain amount of risk and I accept it.

## **CERTAIN RISKS RELATING TO PURCHASE, SALE AND USE OF TOKENS**

***Important Note:*** *As noted elsewhere in these Terms, the Tokens are not being structured or sold as securities or any other form of investment contract or product. Accordingly, none of the information presented here is intended to form the basis for any investment decision, and no specific recommendations are intended. Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (a) reliance on any information contained in this 'TSA', (b) any error, omission or inaccuracy in any such information or (c) any action resulting from such information.*

**By purchasing, holding and using Tokens, you expressly acknowledge and assume the following risks:**

### ***1. Risk of Losing Access to Tokens Due to Loss of Private Key(s)***

A private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in your digital wallet or vault. Accordingly, loss of requisite private key(s) associated with your digital wallet or vault storing Tokens will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted wallet service you use, may be able to misappropriate your Tokens.

### ***2. Risks Associated with the Ethereum Protocol***

Because Tokens and the Network are based on the Ethereum protocol, any malfunction, breakdown or abandonment of the Ethereum protocol may have a material adverse effect on the Network or Tokens. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present risks to the Tokens and the Network by rendering ineffective the cryptographic consensus mechanism that underpins the Ethereum protocol.

### ***3. Risk of Mining Attacks***

As with other decentralized cryptographic tokens based on the Ethereum protocol, the Tokens are susceptible to attacks by miners in the course of validating Token transactions on the Ethereum blockchain, including, but not limited to, double-spend attacks, majority mining power attacks, and selfish-mining attacks. Any successful attacks present a risk to the Network and the Tokens, including, but not limited to, accurate execution and recording of transactions involving Tokens.

### ***4. Risk of Hacking and Security Weaknesses***

Hackers or other malicious groups or organizations may attempt to interfere with the Network or the Tokens in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, because the Network is based on open-source

software, there is a risk that a third party or a member of the Company team may intentionally or unintentionally introduce weaknesses into the core infrastructure of the Network, which could negatively affect the Network and the Tokens.

### ***5. Risks Associated with Markets for Tokens***

The Tokens are intended to be used solely within the Network, and Company will not support or otherwise facilitate any secondary trading or external valuation of Tokens. This restricts the contemplated avenues for using Tokens to the provision or receipt of Services, and could therefore create illiquidity risk with respect to the Tokens you hold. Even if secondary trading of Tokens is facilitated by third party exchanges, such exchanges may be relatively new and subject to little or no regulatory oversight, making them more susceptible to fraud or manipulation. Furthermore, to the extent that third parties do ascribe an external exchange value to Tokens (e.g., as denominated in a digital or fiat currency), such value may be extremely volatile and diminish to zero.

### ***6. Risk of Uninsured Losses***

Unlike bank accounts or accounts at some other financial institutions, Tokens are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer, such as the Federal Deposit Insurance Corporation, or private insurance arranged by us, to offer recourse to you.

### ***7. Risks Associated with Uncertain Regulations and Enforcement Actions***

The regulatory status of the Tokens and distributed ledger technology is unclear or unsettled in many jurisdictions. It is difficult to predict how or whether regulatory agencies may apply existing regulation with respect to such technology and its applications, including the Network and the Tokens. It is likewise difficult to predict how or whether legislatures or regulatory agencies may implement changes to law and regulation affecting distributed ledger technology and its applications, including the Network and the Tokens. Regulatory actions could negatively impact the Network and the Tokens in various ways, including, for purposes of illustration only, through a determination that Tokens are a regulated financial instrument that require registration or licensing. Company may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.

### ***8. Risks Arising from Taxation***

The tax characterization of Tokens is uncertain. You must seek your own tax advice in connection with purchasing Tokens, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

### ***9. Risk of Alternative Networks***

It is possible that alternative networks could be established that utilize the same open source code and protocol underlying the Network and attempt to facilitate

services that are materially similar to the Services. The Network may compete with these alternative networks, which could negatively impact the Network and Tokens.

***10. Risk of Insufficient Interest in the Network or Distributed Applications***

It is possible that the Network will not be used by a large number of individuals, companies and other entities or that there will be limited public interest in the creation and development of distributed ecosystems (such as the Network) more generally. Such a lack of use or interest could negatively impact the development of the Network and therefore the potential utility of Tokens.

***11. Risks Associated with the Development and Maintenance of the Network***

The Network is still under development and may undergo significant changes over time. Although we intend for the Tokens and Network to follow the specifications set forth in this 'TSA', and intend to take commercially reasonable steps toward those ends, we may have to make changes to the specifications of the Tokens or Network for any number of legitimate reasons.

This could create the risk that the Tokens or Network, as further developed and maintained, may not meet your expectations at the time of purchase. Furthermore, despite our good faith efforts to develop and maintain the Network, it is still possible that the Network will experience malfunctions or otherwise fail to be adequately developed or maintained, which may negatively impact the Network and Tokens.

***12. Risk of an Unfavorable Fluctuation of Ether and Other Currency Value***

The Company team intends to use the proceeds from selling Tokens to fund the maintenance and development of the Network. If the value of Ether or other currencies fluctuates unfavorably during or after the Sale Period, the Company team may not be able to fund development, or may not be able to develop or maintain the Network in the manner that it intended.

***13. Risk of Dissolution of the Company or Network***

It is possible that, due to any number of reasons, including, but not limited to, an unfavorable fluctuation in the value of USD (or other cryptographic and fiat currencies), decrease in the Tokens' utility, the failure of commercial relationships, or intellectual property ownership challenges, the Network may no longer be viable to operate and the Company may dissolve.

#### ***14. Risks Arising from Lack of Governance Rights***

Because Tokens confer no governance rights of any kind with respect to the Company, all decisions involving the Company will be made by Company at its sole discretion, including, but not limited to, decisions to create and sell more Tokens for use on the MAVRO ecosystem, or to sell or liquidate the Company. These decisions could adversely affect the MAVRO ecosystem and the Tokens you hold.

#### ***15. Risks Involving Trading Platform***

As the MAVRO provides services, which are linked to large number of financial transactions and trading on online platforms, the Services may involve the transfer and storage of large amounts of sensitive and/or proprietary information, which may be compromised in the event of a cyber- attack or other malicious activity. Similarly, the Services may be interrupted and files may become temporarily unavailable in the event of such an attack or malicious activity. Because users can use a variety of hardware and software that may interface with the Network, there is the risk that the Services may become unavailable or interrupted based on a failure of interoperability or an inability to integrate these third-party systems and devices that the MAVRO does not control with the MAVRO's Services. The risk that the Services may face increasing interruptions and the Network may face additional security vulnerabilities could adversely affect the Network and therefore the future utility of any Tokens that you hold.

#### ***16. Unanticipated Risks***

Cryptographic tokens such as the Tokens are a new and untested technology. In addition to the risks included in this '**TSA**', there are other risks associated with your purchase, holding and use of Tokens, including those that the Company cannot anticipate. Such risks may further materialize as unanticipated variations or combinations of the risks discussed in this '**TSA**'.
